
CHAPTER 14

Configuration Backup And Restoration

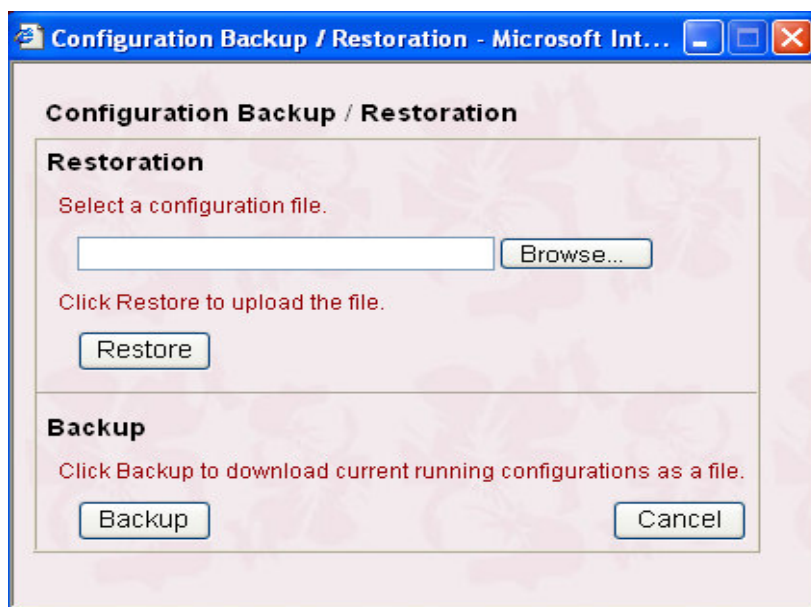

14.1 Introduction

Sometimes you want to keep running configurations of your current router as a file or restore the configurations with the file. The router provides an web-based way to let you backup or restore the configuration very simple.

14.2 Usage

14.2.1 Backup the Running Configuration

1. Go to **System Management > Configuration Backup/Restoration**.
The following windows will be popped-up, as shown below.

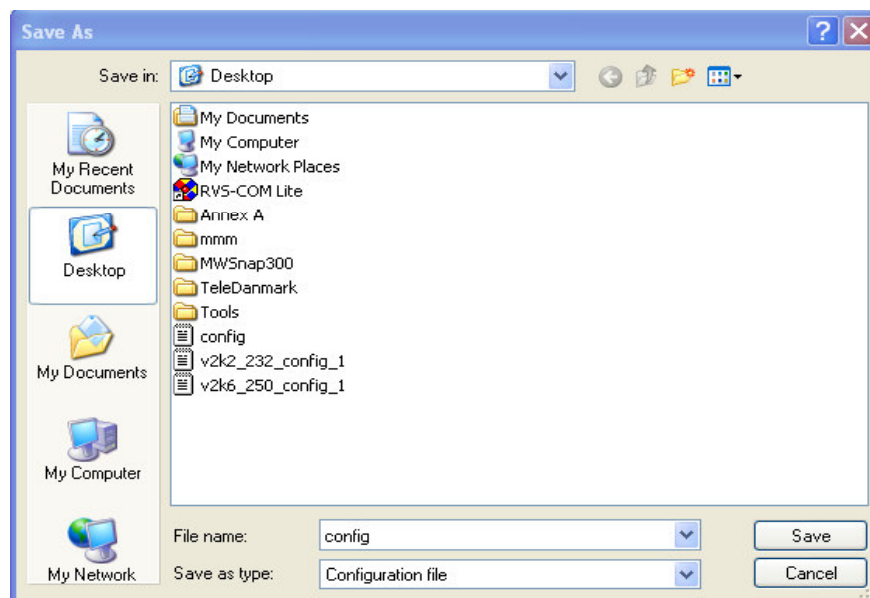

Configuration Backup and Restoration

2. Click **Backup** button to get configurations.

3. Click **OK** button to save configuration as a file. The default filename is **config.cfg**. You could give it another name by yourself.

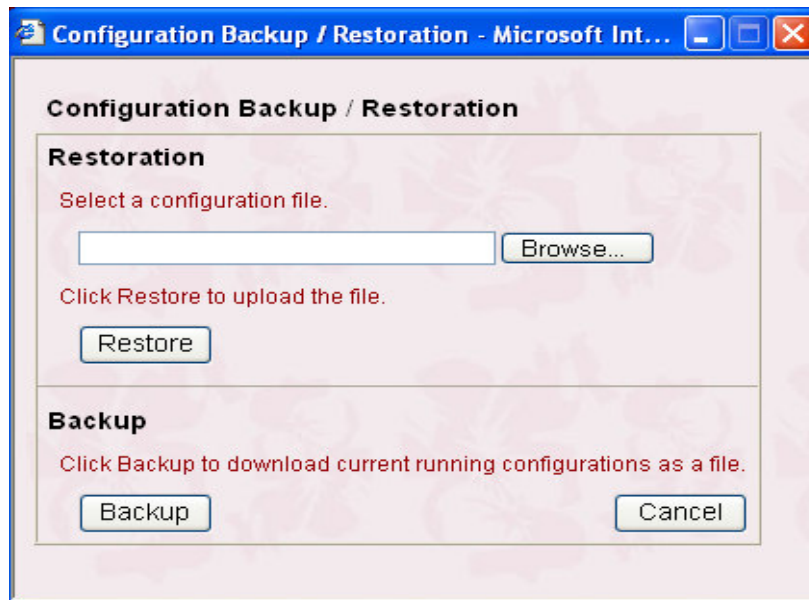

4. Click **Save** button, the configuration will download automatically to your computer as a file named **config.cfg**.

Note: The above example is using **Windows** platform for demonstration. The **Mac** or **Linux** platform will appear different windows, but the backup function is still available.

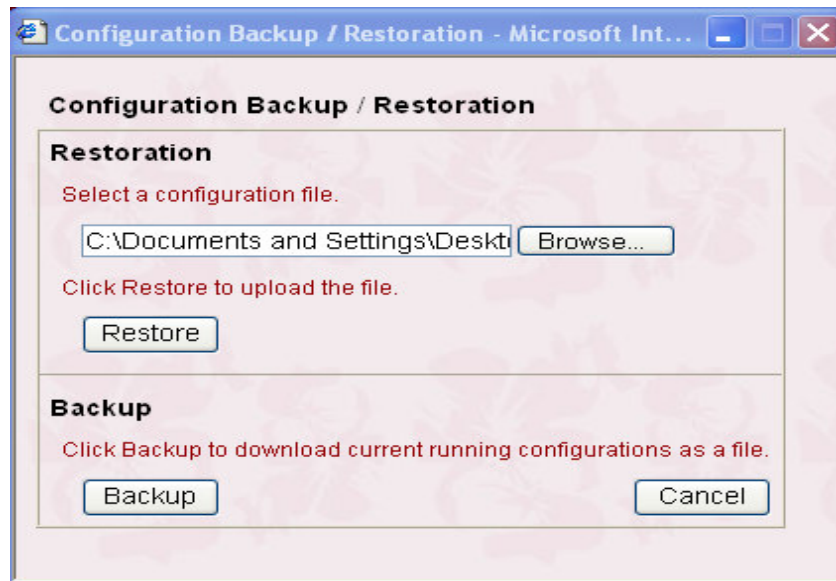

14.2.2 Restore the Configuration with a Configuration File

1. Login **Web Configurator** and then click **Configuration Backup/ Restoration**. The following windows will be popped-up, as shown below.
2. Click **Browse** button to choose the correct configuration file for uploading to the router.

3. Click **Restore** button and wait for few seconds, the following picture will tell you that the restoration procedure is successful.

Configuration Backup and Restoration

4. Click **Restart** button and wait for few seconds, the router will restart by using the updated configurations.
